

**Name (-):** Natalia Carrasco  
**Title (\*):** Ing. Agr. MSc  
**Country/Countries(\*):** Argentina  
**Institute name:** National Institute of Agricultural Technology (INTA)  
**Department/section:** Barrow Experimental Station  
**E-Mail:** carrasco.natalia@inta.gob.ar  
**Web address:** www.inta.gob.ar/barrow

**I AM LOOKING FOR:**    A PARTNER (FOR MY PROJECT)     A PROJECT TO JOIN

**BRIEF DESCRIPTION OF YOUR PARTNER SEARCH (\*)** (2-3 lines to be published on the website – the complete form will be available to download)

We would like to join an existing proposal project. We are a team from Argentina working in two main areas. In agroecology, with an extensive-agroecology-demonstrative farm field with a livestock farming system, which is compared to a conventional management farm field based on agrochemicals use, and working in several agroecological farmers. Also our team conducts actions in Territorial Development with a strong presence in the community. Is used the Participatory Action Research method. Endogenous development is concerned through educative and reflexive activities to different actors.

*Please complete the information below depending if you are looking for a partner (to join your project), or a project (you would like to join) – Max 1 page.*

**DESCRIPTION OF YOUR EXPERTISE /SKILLS**

An extensive-agroecology-demonstrative module has been set up at our Experimental Station, using a livestock farming system, which is compared to a conventional management farm field based on agrochemicals use. Over the last seven years, we have reported that the number of vegetal species was triplicated, the use of inputs (fertilizers and pesticides) was drastically reduced, the productivity was constant, and as nutrient balance as economic results were improved. Also, in the agroecology farm field have been reported a higher potential provision level of ecosystem services (support and structure, regulation, supply and cultural) in quantity as well as in permanency along time. On the other hand, our team conducts actions in Territorial Development with a strong presence in the local community. A methodology research-action participative is used. Endogenous development is concerned through educative and reflexive activities to different actors (youngers, family farmers, rural women, per urban producers and professionals).

**DESCRIPTION OF YOUR PROJECT / THE PROJECT YOU WOULD LIKE TO JOIN**

We would like to join an existing proposal project that aims to the evaluate, analyze and value of multiple dimensions of biodiversity and ecosystem services under different situations of the agricultural environment, contributing to sustainability in economic, social and environmental aspects.
